Matt Sanchez, Abhoy Bhaktwatsalam, Akshay Sabhikhi, Jay M. Tenenbaum, Manoj Saxena

March 2005 **Proceedings of the IEEE EEE05 international workshop on Business services networks BSN '05**Additional Information: [full citation](#), [abstract](#), [references](#), [citations](#)

We introduce SOBA (Service Oriented Business Applications) Fabric, an architectural framework for Business Services Networks (BSN). BSNs extend the enterprise service bus concept beyond the boundaries of a single enterprise, enabling companies to build on each other's applications and create new loosely-coupled, network-centric business models. SOBA Fabric facilitates dynamic integration of people, processes, and information across business and technology boundaries by providing: 1) Dynamic prov ...
